**RESEARCH STATEMENT** My research group explores the emergence of adaptive complexity in robots. Robots that not only compute and learn, but also assemble, repair, and redesign themselves. In pursuit of this, my research brings ideas, algorithms, and materials from biology to robotics and back. Our bioinspired approach is unique in that the entire agent—not just its brain (controller) but also its body (morphology)—is optimized from the ground up, tracing failures in behavior back (through simulation gradients) to errors or inefficiencies in particular parts of the body and brain. The resulting robots all mimic certain aspects of organisms or populations of organisms. But some of our robots are themselves organisms in a very real sense: they are composed entirely of biological cells and tissues.

## APPOINTMENTS

---

2022– **Assistant Professor**  
 Department of Computer Science (50%)  
 Department of Mechanical Engineering (25%)  
 Department of Chemical & Biological Engineering (25%)  
 McCormick School of Engineering, Northwestern University

2024– Consultant, [Sanooke Toys](#) (spinoff from lab)  
 2022– Director, [Xenobot Lab](#)  
 2022– Core Faculty, [Center for Robotics and Biosystems](#), Northwestern University  
 2022– Core Faculty, [Center for Synthetic Biology](#), Northwestern University

2021–2022 **Postdoctoral Fellow**, joint w/ Dept. of Biology, Tufts University; Wyss Institute, Harvard University. Advisor: Michael Levin.

2020–2021 **Postdoctoral Associate**, Dept. of Computer Science, University of Vermont. Advisor: Josh Bongard.

2011–2014 Actuarial Analyst, Chubb Insurance

## EDUCATION

---

2016–2020 **Ph.D.**, Computer Science, University of Vermont, USA. Advisor: Josh Bongard.  
 Dissertation: [Design for an Increasingly Protean Machine](#).

2014–2016 **M.S.**, Statistics, University of Vermont, USA  
 2006–2010 **B.S.**, Applied Mathematics, Ohio University, USA

## FUNDING

---

2025– **NSF CAREER** award, \$576,083.  
[Differentiable Evolution: Efficient Automatic Design of Embodied Intelligence](#).

2024– **NSF FRR** award, \$814,605. Kriegman portion: \$413,909.  
 D Blackiston and S Kriegman  
[Modular biological robots with variable morphology](#).

- 2024– **Schmidt Sciences** AI2050 Collaboration Grant, \$30,000.
- 2024– **Berggruen Institute Fellowship**, \$56,000
- 2023– **Schmidt Futures AI2050 Early Career Fellowship**, \$300,000
- 2023– **Templeton World Charity Foundation** award, \$1,749,983. Kriegman portion: \$286,600.  
PI: J Foster; co-PIs: C Bergstrom, D Krakauer, S Kriegman, M Mitchell, R Rao.  
*Building Diverse Intelligences through Compositionality and Mechanism Design*
- 2023–2024 **CESR** Seed Grant, \$125,000. Kriegman portion: \$65,000.  
S Kriegman and R Truby  
*Sustainable Design and Fabrication of Intelligent Robots*

## HONORS AND AWARDS

---

- 2024 [Kavli Fellow](#), National Academy of Sciences
- 2023 [Distinguished Early-Career Investigator Award](#), International Society for Artificial Life
- 2022 [Outstanding Paper of 2021 Award](#), International Society for Artificial Life
- 2021 [The Cozzarelli Prize](#), National Academy of Sciences  
[Outstanding Doctoral Dissertation Award](#), University of Vermont  
[Outstanding Paper of 2020 Award](#), International Society for Artificial Life  
[Altmetric Top 100](#), Altmetric
- 2020 [Beazley Designs of the Year](#), The Design Museum  
[Top 10 Most Influential BioTech Projects](#), Project Management Institute  
Computer Science Graduate Award, University of Vermont
